

BUTYLⁱⁿ® 54

PRODUCT DATA SHEET POULTRY

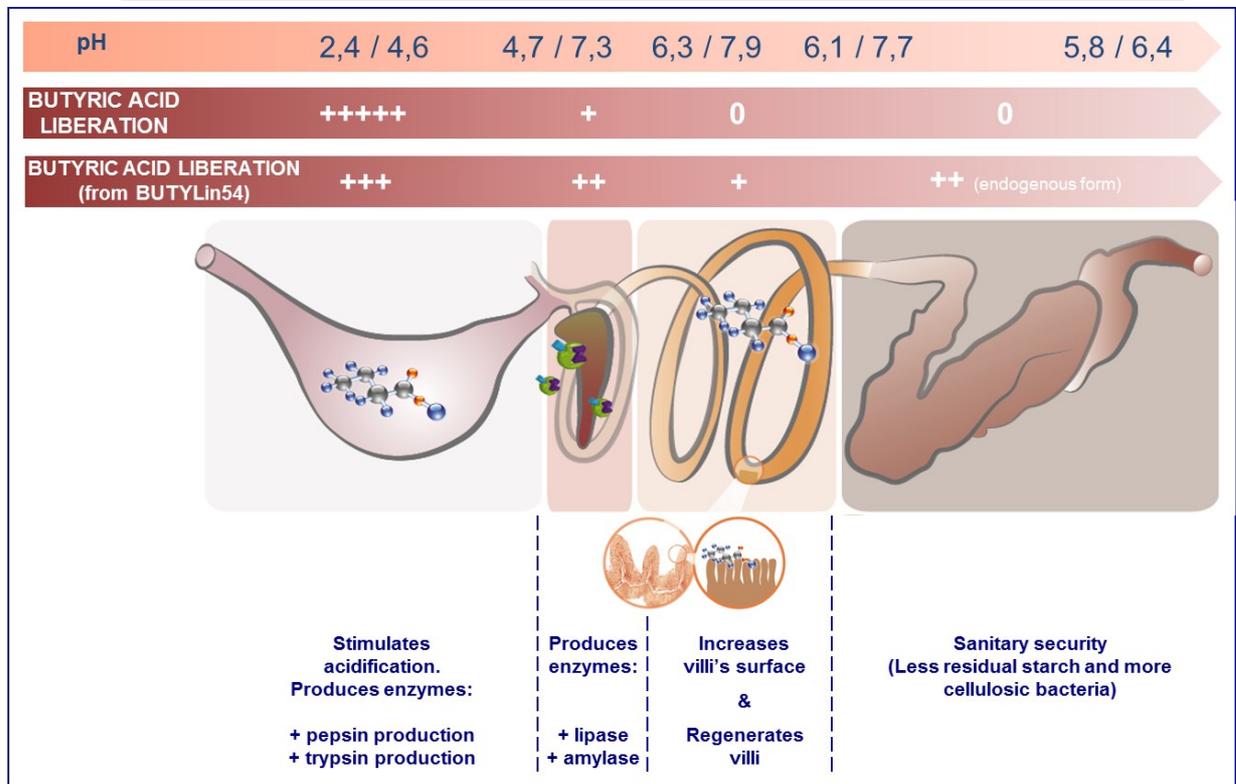

DEFINITION

- 54% of sodium butyrate and its buffer factors.
- Strong proportion of butyric acid (active form) in the organs (stomach, pancreas and intestines).
- Target : Young animals, especially Broilers

BENEFITS

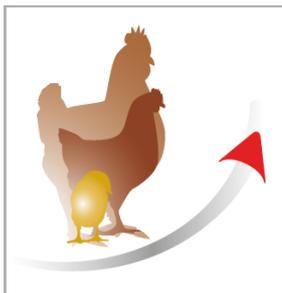

The effects of **BUTYLⁱⁿ 54** are the result of biological actions of the Butyrate combined with buffer factors.

BUTYLⁱⁿ 54 stimulates endogenous enzymatic production of stomach, pancreas and duodenum.

RESULTS :

- Improvement of apparent protein digestibility
- Optimization of Feed Conversion Ratio
- + Safety of feed transition phases

Strategy of BUTYLⁱⁿ 54 utilization:

- Optimization of the formula
- Improvement of zootechnical results (increase of ADG, decrease of mortality...)
